RandSaver

ScreensaversDirectory Value: Path of a folder containing your screensaver collection, relative to Windows directory. If this value is blank, then ScreensaverManager will look in the same directory as the EXE. You must leave this key as blank when

using the built-in screensaver collection. Otherwise, you will have to specify an absolute path to screensavers directory in the ini file. RandSaver Torrent Download Entry Key: ScreenSaver: Description: Name of the screensaver you would like to be selected for randomisation. You can add a name to a screensaver by adding it to the KeyValues/screensaver.ini ini file (or RandSaver.ini, depending on whether you use the built-in collection or not). This name is then used to name the screensaver. A screensaver name can be up to 64 characters long, and there must be no spaces. If a screensaver is selected for randomisation more than once, the name will be replaced with a unique name, and the previous name will be removed. SetList: Description: None SetList: Description: name of the screensaver you would like to be selected for randomisation. You can add a name to a screensaver by adding it to the KeyValues/screensaver.ini ini file (or RandSaver.ini, depending on whether you use the built-in collection or not). This name is then used to name the screensaver. A screensaver name can be up to 64 characters long, and there must be no spaces. If a screensaver is selected for randomisation more than once, the name will be replaced with a unique name, and the previous name will be removed. RandSaver Free

RandSaver is a freeware utility that generates randomized screensavers. RandSaver is free to use, it is not a trial version, nor a trial of any kind. It is also not a tool for creating or modifying screensavers. RandSaver is distributed on the internet, but it does not ask your permission. This is also not a network program. RandSaver is a program that will let you enjoy your collection of screensavers by selecting a screensaver at random whenever Windows requests a screensaver. The first time RandSaver runs, an ini file RandSaver.ini will be created in the same directory. If your favourite screensaver collection is in a different folder, then modify the ini file by typing the path of the directory containing your screensavers as value to ScreensaversDirectory. RandSaver Requirements: When using RandSaver, make sure that you are running Windows 2000 or later. User reviews: "RandSaver is a wonderful screensaver program. I recommend it to anyone who needs a good screensaver." - nt2bnm "Great little app, really randomizes the screensaver images (with the correct associated sounds and effects). Fits in well with the rest of my screen-saver collection and suits my needs perfectly." - lptqcs "This is a freeware app that I have used on my old windows XP, which had to be upgraded to Windows 7." - M0wLFy "RandSaver does an excellent job of creating different looking screensavers that keep my computer looking new." - ssc_123 "This program is amazing!! I highly recommend it! " - Bca_sa "You should try this app. I have it set to set the screensaver each morning with the time set to random intervals between 10 and 30 minutes. My PC stays clean!" - stu321 "No more for me!! RandSaver is my screensaver replacement. I LOVE it and can't recommend it enough." - FS "RandSaver is a great program that I use as my screensaver replacement" - Cave9 "This is a must have! I use it as my main screensaver (set to auto start at logon)" - Tuhme "RandSaver is the best of the best for random screensavers!" - Pao-sar "I love it. It's perfect." - Icy_Ice "
