Jupiter Hell is a turn-based roguelike game in the tradition of Earthbound and Super Metroid. Control a merc of unknown origin, who wants to fulfill an ancient prophecy that will free mankind from the shackles of Hell. The first step to achieving this end is to save as many innocents as possible, and then dig into the planet's treacherous depths to make your way through labyrinthine tunnels, and wipe out a variety of enemy types. There are 45 maps, 3 difficulty levels, 22 weapons, and 40+ enemies. Some maps and enemies require time-gating to explore, and there is also a variety of collectibles to be acquired as well. What's New in this Version 5.0.0 New music and graphics. Fixed a bug where going into the next level was not always progressing. Tweaked some enemy and item appearances and colors. Made some improvements to cloud saving. Some other minor bug fixes. About Hijinx StudiosHijinx Studios is an indie group from Salem, Oregon with about 20 programmers and one designer. We've been hard at work on our strategy game Jupiter Hell since early 2012, but because of the shape our game is taking, it has been extremely difficult to see Jupiter Hell come to life. After putting in a variety of challenges, months of programming, and finishing off a game design document, we've finally taken the leap and released the game as a free open source/free to play game. It's been a huge learning process for us as a company, but we're excited for what our team has accomplished so far. Again, let me thank you for your support and interest in Jupiter Hell. We've been hard at work this whole time, so with your help we think it's time to launch it properly. We've had some great comments from the community, so it's been incredibly beneficial to know that some of you liked Jupiter Hell enough to support a team in the midst of growing and learning. We'll leave you with this, your official launch. The game will be updated regularly to continue to evolve, and we're so glad you're a part of it. We've been pretty busy working on the game ourselves, but soon we'll be taking a much needed breather. We're looking forward to sharing new maps with you, and seeing

The gameplay of Eurofighter revolves around a strategic and fast-paced turn-based tactical movement, a deep squadron system and a deep strategy management, combined with a progressive and cinematic story (the format of each mission is inspired by blockbuster movies) and its unique flying experience (the game offers 2 different flight models, one for dogfighting, and one for air supremacy). 04527 Mooj 04027 YCMI 04130 I'm very happy to be in touch with JT and look forward to hearing their lovely podcast soon. I'm also very pleased to host Felix today! Thanks for having me Felix! In anticipation of a later episode of yours I've been looking over your book. It's so awesome. I recommend it to anyone interested in psychedelic music, and even if you're not. Because you really should've been listening to this from the time you were a kid, and it'll certainly enrich your life all these years later. It's a wonderful document. It's what you'd expect it to be. It's a collection of psychedelic songs by psychedelic artists. It's a fascinating departure in the realm of psychedelic folk from the other albums here. There are far fewer solo acoustic recordings, and increasingly few English speaking records. Not that that's a problem, because the music is excellent in either case. Some highlights: "Jim Morrison" by Alexander "Sandy" Wollner. I was prepared to be biased against this album. 'Bout 80's kids you know, I didn't 'get' it. I quickly changed my tune when this came out as a single. Those early Grateful Dead covers were a hell of a lot of fun. Not to mention Jerry a little low behind the mike. No matter. It's good music. "Vibration" by Charles "Charlie" Haden. Knowing Haden and the origins of the title, there's an immediately recognizable quality to this. It's exactly the sort of song you want to hear when you're stumbling through a dark, crowded room. and you're the only soul in here. It's also very cool when Haden sings "there's a being that no one can ignore." Good stuff. A little esoteric, and a little ecstatic. If just briefly putting some headphones on in the right part of town could have such a deep impact. "Black Sabbath" by Ozark Mountain Daredevils. The only cover on this album. It's typical of the material here. Cool when they sing "
